### Volume 52 (1990)

#### No. 1

P.-G. Nyholm, I. Pascher and S. Sundell (Göteborg, Sweden), <i>The effect of hydrogen bonds on the conformation of glycosphingolipids. Methylated and unmethylated cerebroside studied by X-ray single crystal analysis and model calculations</i> .....	1
T.I. Lotta, A.P. Tulkki, J.A. Virtanen and P.K.J. Kinnunen (Helsinki, Sweden), <i>Interaction of 7,7,8,8-tetracyanoquinodimethane with diacylphosphatidylcholines and -phosphatidylglycerols. A photoacoustic Fourier transform infrared study</i> .....	11
R.H. Stinson (Guelph, Canada), <i>Palmitoyl carnitine can exist in lamellar and hexagonal phases</i> .....	29
D.M. Sadler, F. Reiss-Husson and E. Rivas (Bristol, U.K., Gif sur Yvette, France and Buenos Aires, Argentina), <i>Thickness measurements of single walled dimyristoyl phosphatidylcholine vesicles by neutron scattering</i> .....	41
P. Viani, G. Cervato, A. Fiorilli, E. Rigamonti and B. Cestaro (Milan, Italy), <i>Studies on peroxidation processes of model membranes and synaptosomes: role of phosphatidic acid</i> .....	49
A. Hayashi, T. Matsubara, T. Nakamura and T. Kinoshita (Osaka and Tokyo, Japan), <i>Structure determination of phosphonosphingolipids by fast atom bombardment and tandem mass spectrometry</i> .....	57

#### No. 2

E.E. Brumbaugh, M.L. Johnson and C.-H. Huang (Charlottesville VA), <i>Non-linear least squares analysis of phase diagrams for non-ideal binary mixtures of phospholipids</i> .....	69
M. Kellens, W. Meeussen, C. Riekel and H. Reynaers (Leuven and Izegem, Belgium and Grenoble, France), <i>Time resolved X-ray diffraction studies of the polymorphic behaviour of tripalmitin using synchrotron radiation</i> .....	79
G. Vogel, M. Woznica, H. Gfeller, C. Müller, A.A. Stämpfli, T.A. Jenny and W. Eichenberger (Bern and Freiburg, Switzerland), <i>1(3),2-Diacylglycerol-3(1)-O-2'-(hydroxymethyl)(N,N,N-trimethyl)-β-alanine (DGTA): A novel betaine lipid from Ochromonas danica (Chrysophyceae)</i> .....	99
K. Müller and A. Schuster (Graz, Austria), <i>Solubilization of multilamellar liposomes of egg yolk lecithin by the bile salt sodiumtaurodeoxycholate and the effect of cholesterol — a rapid-ultrafiltration study</i> .....	111
F. Castelli, A. Raudino and S. Gurrieri (Catania, Italy), <i>Calcium ion influence on thermotropic behaviour of dipalmitoylphosphatidylcholine-vitamin D<sub>3</sub> systems</i> .....	129
P.R. Harrigan, T.D. Madden and P.R. Cullis (British Columbia, Vancouver), <i>Protection of liposomes during dehydration or freezing</i> .....	139
T. Janas, J. Kuczera and T. Chojnicki (Wrocław and Warsaw, Poland), <i>Voltage-dependent behaviour of dolichyl phosphate-phosphatidylcholine bilayer lipid membranes</i> .....	151

#### Short Communication

T. Inoue, K. Fukushima and R. Shimozawa (Fukuoka, Japan), <i>Surfactant partition between bulk water and DPPC vesicle membrane: solid-gel vs. liquid-crystalline membrane</i> .....	157
---	-----

#### Nos. 3, 4

D.R. Kodali, A. Tercyak, D.A. Fahey and D.M. Small (Boston, MA), <i>Acyl migration in 1,2-dipalmitoyl-sn-glycerol</i> .....	163
A. Hayashi, Y. Mishima and T. Matsubara (Osaka and Fukuoka, Japan), <i>Occurrence and structural determination of octadecaspheinga-4,8,10-trienine</i> .....	171

C.-H. Chen and S.G. Engel (Albany, NY), <i>The susceptibility of membrane vesicles to interaction with ethanol</i> .....	179	
T.D. Madden, A.S. Janoff and P.R. Cullis (Vancouver, Canada and Princeton, NJ), <i>Incorporation of amphotericin B into large unilamellar vesicles composed of phosphatidylcholine and phosphatidylglycerol</i> .....	189	
K.K. Eklund (Helsinki, Finland), <i>Monovalent cation-induced fusion of acidic phospholipid vesicles</i> .....	199	
M. Vauhkonen and P. Somerharju (Helsinki, Finland), <i>The surface lipid bilayer of human low density lipoprotein probed by diphenyl phospholipids</i> .....	207	
Y. Isaacson, C.D. Sherbourne, R.W. Gross and W.F. Stenson (Washington, DC), <i>The synthesis and molecular dynamics of phospholipids having hydroxylated fatty acids at the sn-2 position</i> .....	217	
R.M. Epand (Hamilton, Canada), <i>Hydrogen bonding and the thermotropic transitions of phosphatidylethanolamines</i> .....	227	
S. Sonnino, L. Cantu, D. Acquotti, M. Corti and G. Tettamanti (Milan and Pavia, Italy), <i>Aggregation properties of GM3 ganglioside (IPNeu5AcLacCer) in aqueous solutions</i> .....	231	
B.A. Holm, A.R. Venkitaraman, G. Enhoring and R.H. Notter (Buffalo and Rochester, NY), <i>Biophysical inhibition of synthetic lung surfactants</i> .....	243	
V.F. Antonov, E.Yu. Smirnova and E.V. Shevchenko (Moscow, U.S.S.R.), <i>Electric field increases the phase transition temperature in the bilayer membrane of phosphatidic acid</i> .....	251	
<b>Short communication</b>		
H. Imasato, J. Procópio, M. Tabak and T. Ioneda (São Paulo, Brazil), <i>Effect of low mole fraction of trehalose dicorynomycolate from Corynebacterium diphtheriae on water permeability and electrical capacitance of lipid bilayer membranes</i> .....	259	
<b>Announcement</b> .....		263
Subject Index Volume 52 .....	265	
Author Index Volume 52 .....	269	
Volume Contents Volume 52 .....	271
